Our Company
About Us

Who is Khula Consulting?

Khula Consulting is the strategic advisory and business transformation arm of the Khula Group, dedicated to helping organisations navigate growth, complexity and the rapidly evolving digital landscape.

We partner with businesses, government institutions and public sector organisations to develop practical strategies that drive sustainable growth, operational excellence and long-term competitiveness.

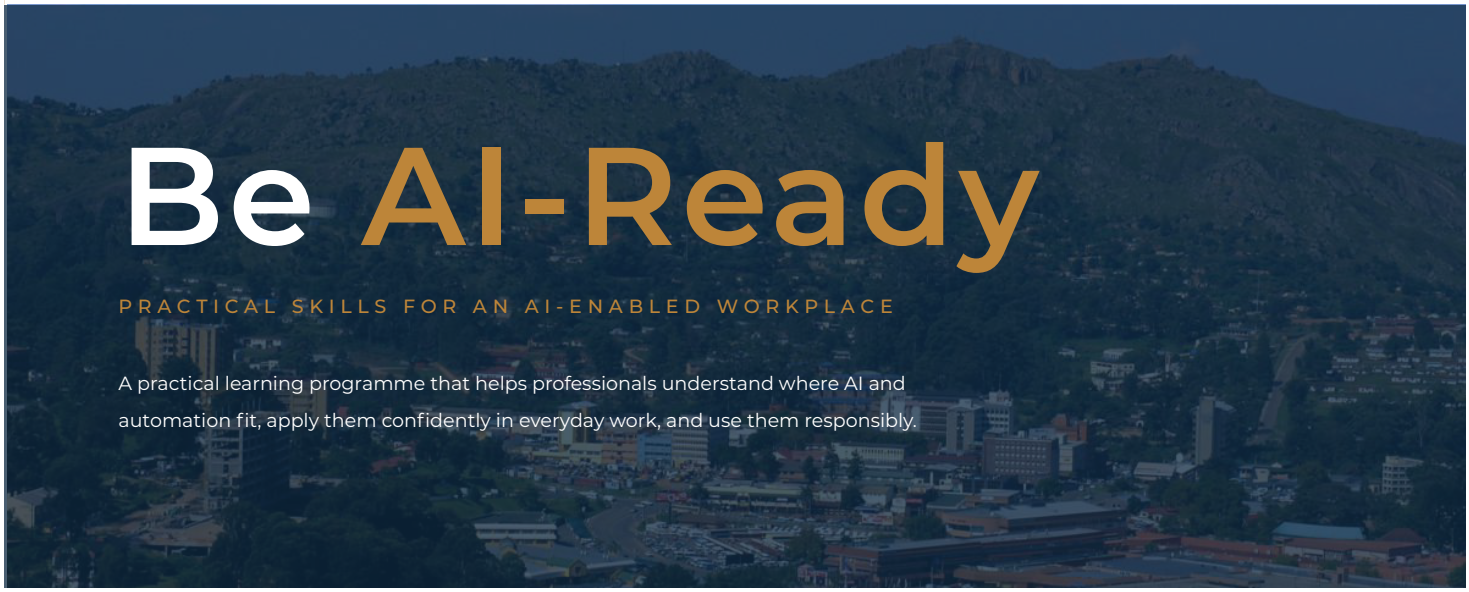

Our expertise spans business strategy, digital transformation, artificial intelligence, intelligent automation, corporate governance, AI and Large Language Model (LLM) policy advisory, human capital transformation, operating model design, process optimisation and executive advisory.

We believe that successful transformation begins with a clear strategy. By combining industry expertise with innovative thinking and practical execution, we help organisations move confidently from vision to measurable outcomes.

At Khula Consulting, we don't just advise—we partner with our clients to design, execute and sustain meaningful transformation.

Why Choose Khula Consulting

- **Strategic Thinking with Practical Execution**
  We develop strategies that are not only visionary but achievable, ensuring every recommendation can be successfully implemented.
- **Business-Centered Transformation**
  Technology is only one part of transformation. We focus equally on people, processes, governance and culture to deliver sustainable change.
- **Future-Ready Expertise**
  Our consultants specialise in emerging technologies, artificial intelligence, intelligent automation and the organisational changes required to thrive in an AI-driven economy.
- **Executive & Board-Level Advisory**
  We work alongside executives and boards to shape strategic direction, manage risk and identify opportunities for long-term growth and resilience
- **Governance-First Approach**
  We help organisations establish strong governance frameworks, including AI and LLM policies, ensuring innovation is implemented responsibly, ethically and in line with regulatory expectations.
- **Local Insight, Global Standards**
  As an African consulting firm, we understand the unique challenges facing organisations across the continent while applying internationally recognised best practices.
- **End-to-End Partnership**
  From strategy development and organisational design to implementation oversight and change management, we remain a trusted partner throughout the transformation journey.
- **Outcome-Driven**
  Our success is measured by the value we create for our clients—improved performance, stronger governance, empowered people and measurable business results.

Be AI-Ready

PRACTICAL SKILLS FOR AN AI-ENABLED WORKPLACE

A practical learning programme that helps professionals understand where AI and automation fit, apply them confidently in everyday work, and use them responsibly.

01

UNDERSTAND

Build practical awareness of AI, automation and where they fit in the workplace.

02

APPLY

Use AI to support everyday tasks, improve productivity and make better use of information.

03

USE RESPONSIBLY

Keep human judgment, data protection, governance and accountability at the center.

04

BUILD CONFIDENCE

Move from simply knowing about AI to confidently identifying where and how it adds value.

Choose Your Learning Journey

Three levels. Practical, hands-on training. Designed to build capability at every stage.

LEVEL 1

Foundation

BEGIN YOUR JOURNEY

- Understand what AI is and where it fits in the workplace.
- Explore practical use cases relevant to your role.
- Learn how to use AI tools safely and responsibly.
- Build confidence through hands-on demonstrations.

IDEAL FOR

Individuals and teams new to AI or building foundational knowledge.

E6,000 per delegate (Inc VAT)

LEVEL 2

Practitioner

BUILD YOUR CAPABILITY

- Apply AI in real work scenarios Integrate AI with tools, data and existing processes.
